

AI Pitch Presentation

For this final assignment, you will work **in 3 groups of 3-4 students** to pitch an artificial intelligence application to the rest of the class. This project is designed to be a creative and collaborative endeavor. As a team, you will prepare and deliver a presentation pitch for the proposed AI application and its ethical components. You are allowed to utilize generative AI to develop your ideas and reflect on its use.

Due dates:

- **Presentation workshop time - 5/8 (in-class workshop)**
- **Presentation plan and elevator pitch script - 5/10**
- **Presentation workshop time - 5/11**
- **In-class presentations - 5/13**
- **All materials submitted on Canvas - 5/14**

Brainstorming AI Pitch Presentation

When deciding on what future artificial intelligence application you want to pitch to the rest of the class, consider the following criteria:

- To the best of your knowledge, this AI application should not already exist.
- You should be able to justify the need for creating this AI application and the gap in the market it could fill.
- You should be able to identify key problems this AI application would solve and explain how it would solve them.
- You should be able to explain the ethical challenges presented by this AI application and ways to mitigate them.

Structure:

Your assignment will include the following components:

1. **Elevator pitch video**
2. **Promotional website**
3. **Infographic or ad**
4. **Research brief**
5. **Class presentation (slides)**

Presentation plan and elevator pitch script - 5/10

Select a topic that interests your team. Brainstorm your ideas and check to see whether your proposed AI application already exists. Look for **at least 1 reliable source** to

support the need for this AI application and hyperlink it. Write 4-5 sentences describing your proposal and the reasons for proposing it.

1. Your presentation plan should include the following components:

- Names of the team members
- Work plan:
 - What are the individual responsibilities of team members?
 - What do you plan to accomplish during the class workshop on 5/11?
 - What do you plan to accomplish after the class workshop on 5/11?
- Link to a shared Google Drive where you will keep all of your work

2. Submit a rough draft of your elevator pitch script. Here is a [sample](#) script.

AI Use:

You are allowed and encouraged to use generative AI to brainstorm potential ideas for your AI application and to provide feedback on your elevator pitch script. **Construct a meaningful and specific prompt and ask for clarification and additional iterations. Do not settle for the first answer provided by AI. You must provide a link to your ChatGPT, Gemini, or other generative AI model conversations.** This will demonstrate your responsible and ethical use of AI.

Instructions for components:

1. Elevator pitch video: This brief video needs to feature all members of your team and pitch your proposed AI application.

Elements of a successful elevator pitch video:

- Concise: is no longer than 40-60 seconds
- Clear: uses language that everyone understands
- Powerful: uses words that are powerful and strong
- Visual: creates a visual image
- Narrative: explains how you will solve a problem
- Attention-grabbing: has a hook that snags your audience's interest and makes them want to know more

Here are some additional resources on elevator pitches: [Wharton Global Youth Program](#); [How to Create the Perfect Elevator Pitch for Your Product](#); [Harvard Business Review: The Art of the Elevator Pitch](#)

2. Promotional website: You need to create a website for your AI application. This website should have several pages, including

- a homepage that includes your elevator pitch video, product description, team members' bios, and contact information, etc.

- 1-2 pages that describe the features and uses of your AI application, FAQ, etc.
- 1-2 pages that discuss ethical implications, privacy policy, etc.
- 1 page with research brief and sources (links)

Your website should be easy to navigate and well designed. You can use Google Sites, Wix, WordPress, or any other software to design your website.

3. Infographic or ad: You can use Canva or similar tools to create an infographic that explains your application's user features/structure OR an ad promoting it to consumers. For either option, your visual needs to be effectively designed and laid out. Consider your target audience and its needs.

4. Research Brief

The purpose of a research brief is to summarize the research findings that underpin your invention. **You should find at least 2 reliable sources relevant to your topic.**

Title and names:

- Include a short and effective title that will state your main idea (similar to a newspaper headline). Next, you will include the names of your team members.

Statement of the Problem (about 200-250 words):

- The introductory sentence should clearly articulate the problem.
- 1-2 paragraphs will summarize the issues the invention addresses and provide background
- The final sentence will explain why this invention is important.

Supporting Research (about 300-400 words). Note: Use in-text citations or hyperlinks for research findings.

- Finding 1 (headline and supporting paragraph(s) based on research)
- Finding 2 (headline and supporting paragraph(s) based on research)

Brief Description of the Invention (about 150-200 words):

- Describe the invention and its key features.

Policy Implications (about 80-100 words):

- Describe what policymakers and society at large could take away from this research brief, and how this invention can be used in the future. Summarize potential regulatory challenges.

In-class presentation - 5/13

Your team will present your final product in class on 5/13. You will present all of the components of your proposed AI application, including the elevator pitch, the infographic, the research brief, and the website. **Create a Google Slides presentation (9-10 slides) that will incorporate these elements, provide screenshots from the website, as well as include your key ideas and points. The last slide can include your sources.** Your presentation should be 8-10 minutes long, and there will be time for Q&A (3-4 minutes). Every member of your team is expected to participate in the presentation and speak. Submit all materials on Canvas.
