 AI Pitch Presentation

General Idea that we plan to expand upon:

Today, misinformation spreads not just through outright lies, but through subtle manipulation of how information is presented. Misleading charts and statistics are everywhere, but there is no good way for the average person to recognize them. According to a 2024 Gallup poll, only 32% of Americans have a “great deal” or “fair amount” of trust in mass media, which signals that people sense something is wrong but often cannot pinpoint exactly what. Our proposed application would use AI to scan news articles, videos, and data visualizations in real time and it would attempt to categorize the different ways each piece of media misrepresents information.

Source to prove that it is a real problem:

*****Elevator Pitch Linked in Google Drive Folder**

Work Plan and Proposed Task Distribution (will be readjusted based on the pace each person works at):

Anish:

- Website
- Research Brief Statement of the problem
- Finding sources for the research brief
- Planning out the in-class presentation w/ Kenan

Kenan:

- Brief Description of the Invention
- Policy Implications
- Planning out the in-class presentation

Baylee:

- Supporting Research Finding 1
- Planning out the elevator pitch video w/ Gina
- Infographic / Aid w/ Gina

Gina:

- Infographic / Aid w/ Baylee
- Planning out the elevator pitch video w/ Baylee
- Supporting Research Finding 2

All: Elevator Pitch and closely related items

Timeline

During Class 5/11:

- Rough Outline of the website
- Statement of the problem for Research Brief
- Sources for the brief
- Starting and rough outline for Infographic/Aid
- Starting the Elevator Pitch planning
- Finding a time to meet outside of class
- Supporting Research Finding 1
- Supporting Research Finding 2
- Invention Description and General Systems Design

After Class 5/11:

- Finalizing and getting the website hosted
- Making sure Research Findings are done
- Meeting outside of class to finish elevator pitch
- Practicing Presentation
- Timing the presentation to make sure we hit the right times
- Policy Implications Section of Research Brief
